DETAILED ACTION

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1-18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.
2. Claims 1, 10 and 15, recitation of "the lamp housing can be remotely positioned in relation to the base by a motor" raises a confusion due to lacking of a motor in order to perform the feature as remotely positioned the lamp housing.
3. Claims 2-9, 11-14 and 16-18 are rejected due to their virtual dependency on the defective claims 1, 10 and 15. Correction made for claims 1, 10 and 15 would also alleviate unclarity toward claims 2-9, 11-14 and 16-18 as well.

Allowable Subject Matter

Art Unit: 2821

4. Due to the confusion as noted above, merit of allowance indication and prior art rejection applied toward the claims 1-18 will be provided according to a reply to this office action.

Citation of pertinent prior art

5. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure.
